# Canada Summit **Stresses Aid to African Debtors**

could build on the economic su cesses of the 1980s in the 1990s.

Toronto, she said, should give an

impetus towards the solution of

problems ranging from protection-

By Reginald Dale

nal Herold Tribune TORONTO - The major industrialized countries opened their an-nual summit meeting here Sunday, and immediately gave high priority to plans for relieving the crippling debt borden of the poorest developing commies.

Officials from a number of the seven nations --- the United States, Japan, West Germany, France, Britain, Italy and Canada — said that one of the three-day summit meeting's main objectives should be to agree on a package of debt relief measures aimed chiefly at the countries of sub-Saharan Africa.

Japan did not wait for the summit meeting officially to open Sunday afternoon to announce a new \$1 billion debt relief package for 17 of the poorest African and Asian

A joint debt relief initiative was seen by officials as a good way of demonstrating the seven's continuing concern with managing world economic problems at a time when their own economic policies do not need major adjustment.

Several delegations stressed that relief for the poorest countries did not imply that similar steps would be taken for more developed Latin American countries.

The seven Western leaders were expected to stress during their talks here that the world economy is in much better shape than generally expected only six months ago, largely thanks to their own success monetary policies.

Margaret Thatcher, the British prime minister, told the opening session that the task of the seven

ism and farm subsidies to Third World debt and the world's eco-For President Ronald Reagan, one of the main priorities was the need to tackle "structural rigidities in economies," such as inflexible work rules, high tax rates and subsidies. Helmut Kohl, the West German ancellor, welcomed a statement by Mrs. Thatcher calling for closer European currency cooperation. Mrs. Thatcher said the EC coun-

their common accounting unit, the ECU, and should hold more of each others' currencies. However, she stopped well short of committing Britain to entering the EC's European monetary sys-

tries should make greater use of

tem, as West Germany and other EC countries have long urged. Japanese and European Community officials said that there was consensus among the seven that exchange rates should be "stabilized at their present levels," meaning that the dollar did not need to

decline further. There was much less harmony, however, on the vexing issue of world trade in agriculture, the subject of a longstanding dispute be-tween the EC and the United

States. EC officials indicated that they would take a strong stand at the summit meeting in the face of renewed calls by the United States

and Canada for a general disman-tling of farm subsidies. British officials said that the issue of debt relief had dominated initial exchanges between Nigel Lawson, Britain's chancellor of the exchequer: James A. Baker 3d, the U.S. treasury secretary: Kiichi Miyazawa, the Japanese finance minister, and the Canadian finance

minister, Michael Wilson. They were optimistic that the summit meeting could agree on a list of debt relief options that would include longer maturities and grace periods, concessionary principal.

The U.S. position, however, still presented "some difficulties," conference officials said. Washington has consistently pointed out that it has legal and constitutional problems with concessionary interest rates and debt write-offs, which would require Congressional ac-

Mr. Baker, on the other hand, had recently shown interest in the lengthening of maturity periods on loans to the poorest countries, a proposal also featuring in plans advanced earlier this month by President François Mitterrand. France also forgave \$50 million in debt to pooor African nations.

The Japanese plan, announced after talks between Noboru Take-See SUMMIT, Page 4

# **Israel Issues** Demand to **Soviet Jews**

JERUSALEM — The Israeli cabinet decided Sunday to force Soviet Jews seeking to emigrate with Israeli visas to travel directly from the Eastern bloc to the Jewish state. Emigration activists said the decision may reduce the influx of

A U.S. Embassy official said the decision appeared to contradict the standing U.S. position supporting freedom of travel for Soviet Jews. The cabinet said in a statement that it would require, "in the frame-

work of legal means available, that

Jews who ask for an exit visa from the Soviet Union in order to come to Israel would indeed reach Israel directly." Israeli officials say the decision is aimed at increasing Soviet Jewish emigration and reducing the number of Jews who go to the United States and other Western countries

instead of Israel. In May, over 90

percent of immigrants decided to settle elsewhere. According to Israeli officials, the cabinet decision means that Jews would be required to pick up their visas at the Israeli Embassy in Bucharest. Once there, the emigrants would be required to fly directly to

Israel. Soviet Jews currently get visas at the Netherlands Embassy in Moscow, which has represented Israel since the Soviet Union broke ties with the Jewish state in 1967.

Most Soviet Jews then leave through Vienna, which enables them to travel to Western European countries or the United States, where they may be granted refugee

importance. We have been urging this on bilateral donors for a long time. There is an important distinction between what bilateral donors can do with official flows

MONDAY Q&A

and what the World Bank can do. The only source of funds we have is our capi-(a) and retained earnings. Q: What contribution is the World

Bank making to finding new solutions?

A: On the debt of the African countries, we have urged a variety of ap-proaches to try to get debt on more favorable terms. For middle-income countries, we continue to be of the view that they have prospects of growing out of the debt

Q: Net disbursements of the bank fell in 1987 from 1986. Why?

A: What you've got is a number of countries which have substantially stopped borrowing. South Korea has a policy of reducing outstanding debt. This is true of Malaysia. Romania has a policy rise as the dollar fell.

A: No. Not because we don't see the to eliminate all external debt by the end of next year. A second category is the highly indebted countries, which have had difficulty sustaining adjustment programs. Yugoslavia is in discussions with us on financing a revised adjustment program, but for the last two years lending for adjustment to Yugoslavia simply didn't occur. Third are countries which stopped botrowing a long time ago --Greece, Spain, Japan. Finally, you have to recognize that starting in 1983, after the outbreak of the debt crisis, the bank took major actions to accelerate disbursements, but that also meant that the

repayments were pulled forward. More important than net disbursements is aggregate disbursements in countries where we are still active lenders. For those, our disbursements in fiscal 1987 accelerated substantially and we expect to have maintained that level in fiscal 1988, of about \$11 billion.

Q: An additional problem seems to be the cocktail of currencies in which the

## WORLD BRIEFS

#### Pretoria-Luanda Talks to Resume

JOHANNESBURG (Reuters) — Angolan peace talks, threatened by a Cuban military buildup and wrangling over the venue, are to resume in Cairo this week, South Africa announced Sunday. A spokeswoman said, Foreign Minister R.F. Botha would meet South Africa's Angolan and Cuban adversaries for two or three days of negotiations, probably starting Thursday.

Pretoria made clear it would press for an explanation for the recent deployment of thousands of Cuban troops on Angola's tense border with South-West Africa, or Namibia, which is administered by South Africa, "It will be a big issue," a diplomatic source close to the talks said.

"It will be a big issue," a diplomatic source close to the talks said.

The United States also will attend the talks on ending 13 years of bush war between Angola's Marxist government and the rebel army of the National Union for the Total Liberation of Angola, which is backed by South Africa and led by Jonas Savimhi. The talks, also aimed at achieving independence for South-West Africa, began in Loadon last month. A, second round was held in the Congo capital, Brazzaville.

#### Tutu Praises Russians on Apartheid

JOHANNESBURG (NYT) - Archbishop Desmond M. Tutu, the Anglican primate of Southern Africa, has described the Soviet Union as an ally in an international campaign to end apartheid in South Africa, and he said Moscow had no selfish interest in southern Africa.

and he said widecow has no senish interest in southern Africa.

The archbishop spoke to reporters Saturday on the grounds of his Soweto home after returning from his first visit to the Soviet Union, where he took part in the 1,000th anniversary celebrations of the Russian Orthodox Church. He said he was not prepared to withdraw remarks be made in Moscow thanking the Soviet people for moral and humanitarian appropriate the strategic against smartheid. support in the struggle against apartheid.

The pro-government press in South Africa denounced Archbishop.
Tutu for having praised the Soviet Union while ignoring its long hostility
to religion and oppression of the church.

## Singapore to Detain 4 Another Year

SINGAPORE (AP) — Singapore announced Sunday that it would extend by a year the detention of four persons who the government says were involved in a Marxist conspiracy.

The Home Affairs Ministry said Teo Soh Lung, Kevin De Souza, Kenneth Tsang Chi Seng and Wong Souk Yee would be detained another year, beginning Monday, under the Internal Security Act. It allows the government to detain people without trial for up to two years, after which detaining may be extended indefinitely.

detention may be extended indefinitely.

The four were arrested in May and June of 1987 and accused of conspiracy to underwine Singapore's government. Released in a few months, they were among nine former prisoners who issued a statement April 18 saying that the government had forced them to confess. All were detained again the next day.

## Libya Boosts Its Investment in China

BELIING (AFP) — Libya became China's fourth-largest source of foreign investment, pouring the equivalent of \$14.3 million into the country in the first quarter of the year, the China Daily's weekly business ent reported Sanday.

The English-language newspaper said that investment by Libya and West Germany had increased in the first quarter relative to that of other foreign countries and "regious"—a emphemism in China for Hong Kong and Macao. Hong Kong, it said, provided \$599.26 million in investments; followed by the United States, \$41.93 million; and Japan, \$41.66 million.

West Germany was lifth at \$11.01 million.

The paper did not provide figures on the total of Libyan investment, nor did it say what Libyans were investing in. Libya in recent years has received Chinese expatriate laborers and is also thought by the United States to be purchasing Chinese weapons.

# Aquino Returns With Pledges of Aid

MANII.A (AFF) — President Corazon C. Aquino arrived from a weeklong European tour that she said had led to pledges of investments and official offers to help improve the Philippine economy.

Mrs. Aquino told welcomers at the airport that her trip to Switzerland, Italy and the Vatican had "equaled if not surpassed my expectations." She said Italian and Swiss leaders had "readily volunteered to help" the Philippine economy, while businessmen had pledged to send missions to explore investments. "We signed nine agreements in Italy and this augur well for the future of our relations," she added.

## TRAVEL UPDATE

# several days of talks in Tehran this week between Iranian officials and

week of strikes by pilots and flight engineers, including a 48-hour strike on Wednesday and Thursday that is expected to cause serious disruptions

In addition, two pilots' unions and the fight engineers' union have called daily strikes Monday through Sunday, from midnight to 8 A.M. The unions are demanding the resignation of the Air Inter chairman, Pierre Eelsen. They say he is refusing to negotiate in a long-standing dispute over the company's decision to fly its Airbus A-320 planes with two instead of three crew members in the cockpit.

## Group to Offer Islamic Airline Food

KUWAIT (AP) - The national airlines of three Arab states are working out a joint venture with Marriott Corp. to set up an Islamic flight kitchen at London's Heathrow airport, an airline official said.

The airlines involved in the agreement are Kuwait Airways Corp., Sandia of Saudi Arabia and Gulf Air, based in Bahrain. The agreement is aimed at providing in-flight food worldwide for Moslem passengers, who are not supposed to eat pork. Moslems also are supposed to eat meat or poultry only if slaughtered under strict religious guidelines.

Cyprus has tightened controls on visitors from the Middle East, Asia

and Africa following a car bombing last month that killed three people. Visitors from those areas will need visas before traveling to the holiday island, officials said. The Federal Aviation Administration has refused to review a limit of 155

lights per hour at O'Hare International Airport despite concerns by the head of the National Transportation Safety Board that the cap may be too high.

NICOSIA — A Tehran official said on Sunday that Iran's relations with Britain were improving and that a visit this week by four mem-bers of Parliament would help the process. The four are trying to win release of three Britons believed held by pro-Iranians in Lebanon.

The Iranian News Agency quoted Deputy Foreign Minister Mohammed Javed Larijani as having said that relations improved after Britain took a "logical and moderate" stance over allegations of Iraqi use of chemical weapons.

Iran accused Iraq of using gas warfare in the Halabja area of northeastern Iraq to kill 5.000 Kurds in March. British government officials expressed concern over the reports to the Iraqi ambas-

er stirs up dust while working his field during a drought that has spread across Midwestern America.

# Midwest Drought: Is More on the Way?

By Walter Sullivan

New York Times Service NEW YORK — Weather specialists studying the drought in the Middle West this year have determined why it occurred. But they are concerned that it might be a harbinger of things to come, perhaps evidence of basic changes in climate brought about by the "greenhouse effect."

For months, a great wall of highpressure air over the central United States has prevented storms bearing rain and snow from penetrating that region, according to specialists of the National Weather Service. The high pressure was locked in place by a jet stream far north of its

Friday, precipitation has been abnormally high in the Northeast and the Northwest even as the Middle West has suffered.

Though the National Acronautics and Space Administration continues to study the possibility of a manned mission to Mars, President Ronald Reagan recently told journalists at the White House, "We've already t today even the most sent a craft to Mars, as you know, in the past," which has "taken some pictures that make you wonder why anyone would want to go there."

> The comedian Chevy Chase said of his recent visit to the Betty Ford clinic at Rancho Mirage, California, to overcome an addiction to painkillers, "I hated the godawful lecturing and group therapy and the endless reassessment of your life and what you've done to get you to such a low point. Well, I didn't feel I was at such a low point in my life, I simply had to

Children Are Often Verbally Contrary

"As anyone who has them can tell you, children have a certain strange contrary streak," writes Anna Quindlen, 35, a mother of two and author of the "Life in the 30's" column of The New York Times. "Nowhere is this more evident than in their ability to put you on the spot when you least expect it and are not dressed for it. If you are having an hour of quiet and introspective time with your little boy, reading with him on the couch and discussing this and that - as will happen perhaps every eight or nine years - his most probing question is likely to be, 'But how come I can't have chocolate chip cookies for breakfast?"

"It is when you have just dropped a dozen eggs in the dairy aisle of the supermarket that suddenly a small voice will say: 'Mom, do all people die? Will you die? Will Dad die? Will I die?' Luckily I've already answered those questions, and hickily I was merely in bumperto-bumper traffic on Route 80 trying to change lanes to get around the stalled tractor-trailer when, from the back seat, I heard the dreaded words, Morn, how does a baby get out of a mother's body?"

For years Canadians have been striking it rich Miguel Pinero Is Dead at 41; in Lotto 6/49—Canada's most popular lottery. In fact, last year Lotto 6/49 paid out over \$500 Million dollars in prizes! Almost every week new millionaires are being made by playing this fantastic game. The jackpots (1st prize) regularly surpass \$10,000,000 per draw and have gone as high as \$13,890,588. That record prize was won

> lottery prizes every awarded. Now, thanks to Canadian Overseas Marketing's unique subscription service, you too have the chance to win a multi-million dollar prize.

> by Lillian and Stewart Kelly, pictured below, and

still stands as one of the world's largest all-cash

#### **MULTI-MILLION DOLLAR PRIZES** Here are some examples of the fantastic jack-

pots being awarded by Lotto 6/49:

-\$13,890,588.80 Lillian and Stewart Kelly Mohamed and Nurahi Samji -\$11,066,864.20 -\$10,372,326.70 Ron and Val Taylor Jean Viau -\$10,191,804,60 Carrie and Derek Stockley -\$ 7,789,787.60 -\$ 7,059,893.70 Doug and Loraine Clark

And that's just for first prize...there are many SMillions more paid out in subsidiary prizes. With five prize categories in all and thousands of prizes won in every draw, it's as if you can't miss!

#### **GOVERNMENT GUARANTEED LOTTERY** Lotto 6/49 is an official lottery operated by the

ten Provincial Governments of Canada. It's called Lotto 6/49 because six winning numbers from a total of forty-nine are selected each draw. If the six numbers chosen match the six numbers you are playing, you win the jackpot. In addition to the six regular winning numbers chosen, there's one additional number drawn called

the "bonus number". If you have any five of the six regular winning numbers correct plus the bonus number, you win second prize. Any five, four, or three of the regular winning numbers correct wins you third, fourth, or fifth prize

EAWIN

respectively. There's a new draw twice each week (on Wednesday and Saturday), every week of the year. The jackpot is guaranteed to be not less than \$1 Million dollars in each draw. And if the jackpot is not won in the current draw, that prize money is carried over and added to the jackpot for the

## YOU PICK YOUR OWN NUMBERS

next draw, growing until it's won!

Besides the enormous prizes to be won, the best thing about Lotto 6/49 is that you pick your own numbers. So, instead of just buying a ticket, you really do play this lottery. Many people feel they have certain personal lucky numbers or numbers that have a special significance to them, such as birthdays or anniversaries. Still others look for statistical patterns in the numbers selected. But whatever method you use, you'll find it much more exciting to play the lottery that lets you enter your own numbers.

## IT'S EASY TO PLAY

All you do is complete the attached order form and send it to Canadian Overseas Marketing along with the necessary payment. We will enter your numbers for the specified length of your subscription. You may select from 1 to 6 games for 10, 26, or 52 weeks. Indicate exactly six numbers between 1 and 49 for each game you wish to play. Each game gives you another chance at the grand prize for every draw in which you are entered.

You receive a "Confirmation of Entry" by return mail acknowledging your order and

## Police in Turkey Capture Gunman

Compiled by Our Staff Front Dispatches ANKARA — Investigations into an attempt to assassinate Prime Minister Turgut Ozal of Turkey are centering on possible links with an ultrarightist group active before the 1980 military coup, security sources said on Sunday.

Mr. Ozal was shot in the hand as he was addressing 5,000 members of his ruling Motherland Party and foreign diplomats in Ankara on Saturday. A second bullet missed

Officials said 15 other persons were wounded as the police re-turned the assailant's fire. "Police fired at random," said a former prime minister, Bulent Ecevit. The police said they had shot

and disarmed Kartai Demirag, a Turk who belongs to the Grey Wolves group, which was blamed for many political killings in the

"We are conducting a widescale investigation looking into political links," said a state security court prosecutor, Nusret Demiral. "The attacker is of sound mind and cool and collected. He has shown no signs of regret."

The newspaper Sabah said on Sunday that its Istanbul office had

By Joseph Fitchett nal Herald Tribuse PARIS - Governor Michael S. Dukakis's East-West issues.

principal security adviser, Joseph S. Nye Jr., has told a diplomatic audience in Paris that there will be "no more loose talk about getting rid of nuclear weapons" from the United States if Mr. Dukakis is elected president. Speaking at the French Institute for Inter-

national Relations, Mr. Nye said that there should be "no free gift" for Mikhail S. Gorbachev, the Soviet leader, on disarmament, Many listeners said they were surprised and gratified by the extent to which Mr. Nye stressed that Mr. Dukakis's intentions overlapped some of the firmer policies of the Reagan administration.

At the same time, Mr. Nye said, Mr. Dukakis was committed to more intensive consultations in the Western alliance. Agreement on deploying intermediate-range missiles in Europe, he said, was a model of good consulta-

Mr. Nye, who is mentioned as a possible national security adviser in a Dukakis administration, said some European media had been "silly" in depicting Mr. Dukakis as a naive idealist resembling George S. McGovern, the Democratic presidential candidate in

Mr. Dukakis's top priority of maintaining the Western alliance, Mr. Nye said Friday, showed that he would not repeat what Mr. Nye called President Jimmy Carter's mistake of putting North-South relations ahead of

Dukakis Aide Assures Europe on Arms

In seeking to maintain a military balance, Mr. Nye continued, it would be "foolish" to enconrage Japan to exceed its limits on defense spending because a remilitarized Japan would alarm many Asian nations.

Charging that President Ronald Reagan had undermined Western acceptance of nuclear deterrence, Mr. Nye said that a Dukakis administration would consult closely with its allies about a new mix of nuclear and conventional forces to defend Western Europe.
"No more Reykjaviks," he said, referring

to the political shock in Europe after Mr.

Reagan nearly agreed, without consulting European governments, to a Gorbachev plan to eliminate nuclear weapons, at the Iceland summit meeting in 1986. But Mr. Nye praised the Reagan administration's 1986 bombing raid on Libya and the use of naval forces to escort oil tankers in the

military strength. Mr. Nye, who served as a deputy undersec-retary of state in the Carter administration,

Gulf as "reasonable, prudent use" of U.S.

said that Mr. Dukakis was better qualified than Mr. Carter because he could "see the big picture" and "hold his own agenda."

And, he continued, unlike Mr. Reagan or Mr. Carter, Mr. Dukakis is "not running as an outsider" seeking to change the main thrust of U.S. foreign policy.

Elaborating on Mr. Dukakis's policies, Mr. Nye said that: Soviet behavior on human rights issues would be an important element in deciding

about possible East-West coexistence at lower, less-costly levels of armaments. Research on a Strategic Defense Initiative would continue, without the Reagan ad-

ministration's emphasis on early deployment. A break could be expected on U.S. policy toward South Africa because the Democratic Party, which believed that apartheid has be-

a tougher approach. U.S. troops would remain in Europe, but they might be reduced if the allies agreed to a plan that kept West Germany solidly embed-ded in Western security systems.

come a domestic issue in U.S. policy, wanted

Mr. Nye's trip to Europe was apparently tied to a foreign policy speech by Mr. Duka-kis last week, shortly after he clinched the Democratic nomination.

A 'Devil' to the Soviets

By David Remnick

هكذامن الرجل

Washington Past Service
MOSCOW — In the dark, weary days before Mikhail S. Gorbachev assumed power in 1985, Richard Pipes was a "devil" to the Soviet Union. As both a historian and an adviser on Soviet affairs in the Reacan administration's first term, Mr. ipes epitomized the hard line. They really hated me here," he said. "I was pure evil."

He is here now on his first trip to the Soviet Union in 13 years, and he cannot quite believe all that he is hearing and seeing.

A few days ago, Mr. Pipes was sitting in his room at the National Hotel, near Red Square, watching a television documentary called "Ca-thedral." He was impressed. "In fact, I was stunned," he said.

"First they showed the dynamiting of churches during the Stalin era. Then a young woman came on the screen — not an old babushka kissing icons, not that stereotype -

# **Small Expectations**

All the vibrations indicate screnity and smaller and more manageable African debts good feelings this week in Toronto. The chance of serious friction or even serious discussion is low --- lower than last year or in most years — as the seven big industrial democracies meet for their annual session on economic strategy. Things are rocking along pretty well for most of the rich countries, and in any event the Americans have explained to everyone that their tribal customs and precepts forbid them to make hard decisions in the years in which they elect a president. The other six governments have accepted, with a sigh, the warning that the Americans do not intend to participate in much history at Toronto.

The threat of world recession seems more remote than it did last year at Venice. Japan. for example, has just published figures showing that its economy is growing at a rate of 11 percent a year. For people who make economic policy, there is plenty to worry about, but none of it seems very urgent. The big issues have all slid off into the middle term. The American budget and trade deficits are menacingly large but no worse than last year, and the trade deficit, at least, is coming down a little. The dollar is stable for the moment; Japan and Europe have apparently decided to finance it until the election, although they have made no promises for next winter. There is a growing sense that the big Latin American debts may have to be reorganized, but Toronto will confine itself to the much

and leave the Latins to another day.

Of the second-level quarrels on the agenda, the most divisive is agricultural subsidies. Washington has many sins of subsidy for which to answer, but the chief malefactor is the European Community. It claims, wrongly, that its grossly overdone subsidies are the price of social stability. Europe is only buying off some of the agricultural lobbies at home while it dumps products abroad on a scale that causes real distress to small countries in the Third World. The United States is absolutely right to press for more rational rules of the game, but so far the Europeans are defensive, huffy and adamant.

The Toronto meeting will probably be memorable chiefly for the allies' farewell to Ronald Reagan, who has changed their countries as well as his own. The American example has made tax reform a major objective, with the inevitable emphasis on reduction of top income tax rates. Reaganite ideas about wide-open financial competition have forced other countries to choose between opening up their markets or being left out of the game. Not all of the other six politicians meeting in Toronto are convinced that the world's emerging financial system is either stable or durable. But while they may have doubts about Reaganology, they have warm regards for the genial man who personifies much of the spirit of their own times.

- THE WASHINGTON POST.

# Zia Promises Again

Mark Twain once remarked that giving up smoking was easy; he'd done it dozens of times. President Mohammed Zia ul-Haq of Pakistan has no difficulty talking about democracy and constitutional rule; he promises them all the time. After seizing power in 1977, he vowed to call elections in 90 days; it took eight years. Now he again promises to call elections within 90 days, but aides say there is a difference between calling them and holding them. Given Washington's close identification with this increasingly unpopular general, the administration and Congress need to send a

strong public signal of displeasure. The latest round of unkept promises began when General Zia dismissed his prime minister, Mohammed Khan Junejo. Mr. Junejo, it appears, was too independent, and possibly too zealous in investigating the explosion of an arms depot that killed more than 100 people. Two generals close to President Zia are said to be culpable for establishing the depot, whose arms were meant for Afghan guerrillas, in a populated area. And the prime minister was evidently too affirmative for the president's taste about the recent accord mandating a pullout of Soviet troops from Afghanistan.

So what is the United States to do? There

able for Washington to let him known American confidence is also eroding. is nothing new about General Zia's high-

handedness, nor about his nuclear ambitions. U.S. law requires cutting off aid to countries that pursue a nuclear weapons capability, but the administration has waived this action for eight years. Legal imperatives were offset by progress toward constitutional government - the end of martial rule, the return of political exiles and the 1984 elections - and by Pakistan's support for the Afghan rebels fighting to drive Soviet invaders from their country. As the Russians now withdraw, and with General Zia reasserting personal rule, Congress would do well to reconsider its nuclear waiver.

Granted, as long as General Zia retains the confidence of the dominant military, an aid cutoff from Washington probably would not matter much; that is the lesson demonstrated by General Manuel Antonio Noriega in Panama. But it is sensible to assume that General Zia resists holding a free and fair election because it might expose his unpopularity. He may be fearful that elections would upset his regime much as they did that of Ferdinand Marcos in the Philippines.

If he unreasonably postpones elections, it is fair to conclude that his regime has lost the confidence of his people. It would be reasonable for Washington to let him know that

- THE NEW YORK TIMES.

# **Business as Usual?**

Senator Charles Grassley, an Iowa Republican, says that the breadth of the defense procurement scandal now unfolding the money is fierce. The competition is is "beyond the wildest imagination," while complicated by the fiction, or theory, that his colleague John Warner, a Virginia Republican, calls it "the most widespread case try whose relationship with its best and in I or anyone else has ever seen," "the most many cases only customer is arm's length. serious case in the history of the Department of Defense." They may be right, but it interests of buyer and seller, service and seems to us a little early to make such epic contractor, tend to be the same at least as judgments. It is equally early to say, as often as they are opposed. The service wants Pentagon spokesman Dan Howard did rethe weapon that the contractor wants to sell; flexively the other day, that "this is an the money is someone else's. Not just profits investigation of individuals - it is not an investigation of institutions," or to contend, as Mr. Howard did in Defense Secretary Frank Carlucci's name, that "we have a very solid, adequate acquisitions process."

In fact, neither the senators nor the secretary and his spokesman can know yet. They are still operating, as we all are, on early fragments of information. Search warrants and subpocuas have been issued, and representations made to a court, but it is not even time in the process for the customary warning that a person is innocent until proven guilty. No one has even been indicted.

That is as to individuals. As to the system, it would help enormously if the people expressing so much shock on all sides would leave the choir-boy robes at home. Bribery and the buying of information of the sort alleged here are awful, illegal, corrupting, wrong - and in some ways the logical extension of a process that goes on all the time.

The Pentagon now lets more than \$100 billion in weapons contracts (procurement plus research and development) a year.

staffs, is seeking information from and impor-

# **OPINION**

# Time for Moderates Is Fast Running Out

PARIS — Prime Minister Yitzhak Shamir said after a firebomb attack in Tel Aviv on June 12: "The conflict is over survival. We are talking about injury to our actual being, and such should be our defense." Reported deaths since the Palestinian uprising began in December stand as at least 218 Arab and three Jewish lives. These are not the tolls of open warfare, but Mr. Shamir makes it sound as if another war were

nearly there, indeed, as if it were awaited.

The extraordinary decision of the Israeli Defense Ministry authorizing civilians as well as soldiers in the occupied territories to shoot Palestinians "who are seen holding firebombs in their hands" stops little short of wartime firing at the enemy when he shows his head.

So far has the situation degraded, step by step, always in one direction. Who is to say if someone "seen holding a firebomb" actually has a bottle of soda? Who judges the West Bank settlers' claim to self-defense?

A couple of days later, the Paris newspaper

By Flora Lewis

severely beaten an Israeli construction foreman near Kiryat Arba. "Terribly sorry," they said, "we thought be was an Arab." They had shouted at him in English and he didn't understand. Who is to decide which is the enemy?

Those who insisted six months ago that only a tough Israeli response could restore order, and who complained that Israeli "enforcers" were being unfairly criticized, are getting their answer. More trouble, more hatred, more destruction. Joel Brinkley of The New York Times reports that the Tel Aviv firebombing and arson in painstakingly reforested areas inside the "green line" (pre-1967 Israel) are awakening the majority of Israelis going about their daily lives to the reality of the new pandemic warfare.

In effect, many people remain apart from the hostilities, but these are spreading. The further the hostilities go, the more chances which existed Le Monde reported the explanation of three for compromise are disappearing. Mr. Shamir West Bank settlers to the police after they had

#### For Peace Talks Between Israel and the Palestinians

WE the undersigned urge immediate inter-national attention at the highest level to Israel over substantive issues. foster negotiations between the state of Israel and the Palestinians, based on mutual recognition of national legitimacy and the exchange of territory for peace. The bloody violence and loss of life in the disputed territory underscores the urgency of constructive negotiations. Now is the time for a Declaration of Peace for the Middle East. We support the continued independence and

security of the state of Israel. We equally affirm the right of self-determina-tion and security for the Palestinian people. We believe that mutual recognition and goodfaith negotiations between Israelis and Palestinians can achieve a just settlement and that such a settlement should be guaranteed by appropriate international peacekeeping arrangements. We further believe that such a political settlement can result in a reduction of the military burden for the people of the Middle East and open the way for constructive economic, social and cul-

Negotiations must involve not only the Pales-

tural development in the region.

An international conference including active roles by the United States and the Soviet Union can facilitate bringing the various parties together, establishing assurance of fairness and opening the way for substantive bilateral negotiations. - George W. Ball,

former U.S. undersecretary of state. - Garret FitzGerald. former prime minister of Ireland.

— Barry Goldwater, former U.S. senator and Republican presidential nominee (1964). — Anker Jorgensen, mer prime minister of Denmark. — Philip M. Klutznick, former president of the World Jewish Congress and former U.S. secretary of commerce.

— Bruno Kreisky, – George McGovern,

former chancellor of Austria. former U.S. senator and Democratic presidential nominee (1972). from occupied territories to Israel proper is some sort of breach of tacit rules, as if Palestinians had accepted the division of territories, albeit without peace, which he himself rejects.

He is probably right that the longer the confrontation continues, the more Arab hopes to destroy Israel altogether are fanned anew. Both sides are being driven to mounting violence, and the question comes nearer of how long it will be that guns are available to one side only.

George Shultz keeps plodding doggedly around the Middle East, without much hope of at last engaging in negotiations but trying at least to keep up the appearance of some kind of peace process, of some kind of diplomacy as an alternative.

But there probably will be no breakthroughs before the U.S. elections in November. By then Israel will also be holding elections, and the signs are that Mr. Shamir will win against the seemingly more moderate but indecisive Labor Party leader, Shimon Peres. And Mr. Shamir will have Ariel Sharon, the former general, urging him to take off what safety catches remain on Israeli arms.

Meanwhile, there is escalation in the quality and destructiveness of arsenals throughout the region. The Russians agreed at the Moscow summit conference to begin talks with the United States on limiting the transfer of missile technology, and there were long but evidently fruitless discussions on the Middle East. It is all too slow.

The danger signals are growing urgent.

An estimated 10,000 to 20,000 people in the fundamentalist movement Gush Emunim seem to have seized the initiative from politicians and to hold Israel hostage with their victous provocations of Arabs, just as activists hold the Palestinians hostage. American Rabbi Meir Kahane, leader of Kach, is one of the Israeli militants' most virulent spokesmen. A surprising number of the fighting fundamentalists are American emigrants. They see themselves as modern Maccabees, waging a holy war to victory or cataclysm.

As Ian S. Lustick, associate professor of government at Dartmouth College, says in the bulletin of the Council on Foreign Relations, these are added reasons for the United States and American Jews to be concerned. But so far Defense Minister Yitzhak Rabin has refused to order the disarming of Kach members.

This is not a time for moderates to be patient or indulgent. The way things are going, there will soon be no time at all for moderates.

# Philippines: Economics Should Have Priority

By Amando Doronila

MANILA — A proposal for \$10 billion in aid from a group of Western and Asian countries to assist economic recovery in the Philippines is meeting strong reservations from vocal segments of public opinion here. This surge in skepticism is unfortunate because it occurs as efforts to build international support for the multilat-

eral aid plan are gaining momentum. The United States and Japan have said they would seek backing for the initiative from other leading industrial powers at this week's three-day summit of Western leaders in Toronto.

The proposal for a coordinated assistance program has suffered from bad timing since its inception. The fact that it was first put forward by a bipartisan group of four members of the U.S. Congress last October as the Philippines and the United States were preparing to review a long-standing bases agreement that permits American forces to operate from the attack from nationalists and the left.

As debate becomes more emotional over whether U.S. use of the bases should be allowed after the current agreement ends in 1991, and over how much compensation Washing-ton should pay Manila for continued access, the multilateral aid program is also coming under heavy fire.

The plan has some influential supporters in the government and private sectors in the Philippines. They see it as a means of spuring sustained growth of the economy, strengthening political stability and consolidating the structure of democracy restored since the end of the Marcos regime in 1986. President Corazon Aquino said she was willing to accept the aid program so long as it was not conditional on renewal of the bases agreement.

Nationalists, as well as the left, argue that the aid plan is a device to try to soften the ground for acceptance of the bases beyond 1991. The bases are sustain this growth rate.

considered by the United States to be among the most strategically impor-tant in the Western Pacific. They help

counter Soviet power in the region and support a U.S. military presence in the Indian Ocean and the Gulf. A postwar history of unequal military, economic and political relations between the United States and the Philippines contributes to a deep-seated suspicion among Filipinos that any "aid" initiated by the United States has strings attached. The nationalists and the left, including the outlawed

Communist guerrilla movement, suspect that approval of a multilateral aid package will come only if Manila agreed to continue allowing American forces unhindered operations from Clark Air Base, Subic Bay Naval Base and other military facilities. In addition to the United States. potential participants in the aid arthe European Community and the As-

sociation of South East Asian Nations, Australia, South Korea and Taiwan. But Filinino critics will not accept that a multilateral structure could prevent the United States from dominating the agenda of the plan and using it in a trade-off for concessions on the bases. A powerful streak of isolationism in Filipino nationalism prevents it from recognizing the possibility that broad-ly based assistance could help the country lift itself from the bottom of

the development ladder in ASEAN. President Aquino has said that the Philippines has the potential to be the "next economic miracle" of Asia. Official statistics show that in the first four months of 1988, GNP grew by 7.5 percent, compared with 5.5 percent in the same period last year. But unless there is a large injection of foreign investment, government economists believe that it will be impossible to

If a multilateral aid program were

properly packaged, it could provide just the kind of resource transfusion needed by the Philippines, where economic expansion is restricted by the burden of repaying foreign debt amounting to \$28 billion. About 40 percent of annual export revenue is eaten up to service this debt.

The multilateral aid proposal has been dubbed a mini-Marshall plan, after the U.S.-funded program that helped Western Europe revive from World War IL But there is a better contemporary model for assembling such a consortium. Known as the Inter-Governmental Group on Indonesia, it has pumped huge amounts of economic assistance into Indonesia since the late 1960s. At a recent meeting in The Hague

the group assembled a new package of financial and technical aid worth members are the United States, Japan, European countries, Australia, Chronicle and a prominent political New Zealand, the World Bank, the analyst, contributed this comment to Asian Development Bank and the Un- the International Herald Tribune.

strength comes room for maneuver to increase political independence. The writer, editor of The Manila

# For a Political Conversion to Growth

P ART of the West's problem is lack of confidence. It has been so ham-mered in the last 15 years by OPEC, inflation and recession that it cannot recognize a good day when the sun shines. But we are in the sixth year of sustained growth. The June 9 OECD figures tell us that the economic outlook for the industrialized countries exceeds all expectations.

And the Third World is underestimated. Those countries take almost 20 percent of the West's exports. Their total GNP is well above \$2 trillion. If they were on full throttle, instead of limping along, they would lift not just themselves but the West as well.

race with the United States. Even

after achieving basic parity in inter-continental ballistic missiles, the

committee charged, it had not signif-

icantly improved its world influence.

If the Soviet leadership believes

that resources allocated to the mili-

tary have produced diminishing re-turns in security and political influ-ence abroad, it could decide to

unilaterally cut defense allocations

An argument about the decreas-ing ability of the U.S. economy to sustain its defense burden, recently

popularized by Paul Kennedy at

Yale, suffers from the same fallacy.

By suggesting that America may be unable to afford its military role, Mr.

Kennedy and others avoid the ques-

tion of whether the defense buildup

in the last decade brought any real

inprovement in American security

spending more on arms produces for International Peace. He contributed few political benefits. Last month this comment to The New York Times.

in the next five-year plan.

The Toronto summit package of debt relief for Africa will do little for the world economy at large. Most of Africa is too poor to count. The really important issue is the Latin American and Filipino debt, together with that of the African countries which carry economic clout --- Ivory Coast, Nigeria and Morocco, which are not included in the present package.

Most of them have gone about as far as can be expected to sort out their end of the problem. After years of belt-tightening, they now export more than they import, and since 1985 they have resumed economic growth. But it is slow. Per capita ocome is still shrinking, and so is their buying power. According to UNICEF, infant mortality rates are rising after two decades of decline.

The issue, as with arms control, is

not the method; experts can work that out in their cloisters later. It is the political decision to judge that the time is right. The IMF recently warned that if further bank money is not forthcoming, the effort to solve the debt problem may collapse. The banks need political leadership.

Toronto is the occasion to pull all this together. The West is at a historic juncture. When everything is going for it — economic success, peace with its principal political adversaries — surely the time is right to put the globe on a new trajectory, with economic well-being becoming the norm.

# The Chin Are Rooti For Glasn

By Liu Bin

OS ANGELES - PRO L country outside Pasteri is more concerned than China thou the success of Mikhail Gorbacher's reforms. Just as China's achieve

paper has been allowed to match the way the Soviet media boldly expose political mistakes, stimulate discussion of political questions and codici. ly challenge conservative views.

The Chinese are no less interested in social and political issues. From 1978 to 1980, when The People's Daily was unusually frank and courageons in circulation rose to seven million is er, as the paper reverted to a more

The people have learned to think for themselves.

cautious style, its circulation dropped by half. In the Soviet Union, with a population of more than 280 million Prayda circulates more than 10 million copies. Even allowing for lower literacy rates and less average buying power in China, there is no reason why a population of more than a billion should produce a newspaper reader-ship smaller than Pravda's.

I argued in a speech in China in 1984 that the cover-up of issues in Chinese political and social life driver the people from the Communist Party and increases their indifference said: "Our level of democracy will be determined by our degree of openness; because democracy, to a large extent, is the right to choose." My term "openness" was meant in quit. the same sense as the glasnost advocated by Mr. Gorbachev in 1985. Yet China still has no glasnost.

Russian reformers enjoy one dis-tinct advantage over the Chinese in the pursuit of glasnost. Mr. Gorbachev represents a new generation of leader who were not shaped by the Staining era. While reformers in both countries must contend with a strong authoritisian tradition, Statin has been dead for 35 years. Mao Zedong died in 1976. Moreover, Stalin, unlike Mao, valuei the utility of intellectuals. Today there are proportionately more intellectuals in the Soviet Union, with more jobs.

open to them, than in China. A postwar history of economic de velopment and internal peace makes it. harder for Russian reformers to argue convincingly for perestroika. The Chinese reformers, who have no such les-

formers is the Cultural Revolution which devastated both the colium and the economy. While Mao's influence still grips many in the political clit. the experience of the Cultural Revolution has cured many Chinese citize of the superstitious belief in person authority and freed them from politi-

have learned to think for themselves. This energy, newly unleashed by INDINE free market measures, has made and nomic reforms in China a partial success [N])! cess. Tens of millions of Chinese have . escaped economic relationships of de the transfer of the trans pendency to take charge of their own iives and to pursue their own economic interests. Yet the success is limited by the old, immutable political system which has not kept pace with the de mand for reform. The huge and ever expanding bureaucracy continues to threaten individual interests.

Tens of millions of Chinese are still without adequate food and warm and severe inflation is causing near everyone's standard of living to fall These facts stand in sharp contrast to the extravagant luxuries enjoyed by

the extravagant luxumes enjoyed on those who retain power and privileged.

All these conditions contribute to a tremendous thirst for change. This great popular yearning is a key reason why economic reformers have had more success than their Soviet counterparts. Now they hope that Mr. Gotte chev is as successful in the pointer realm as they have been in the conomic. That could give the push they need to bring political reform to China.

In the ten short years in which China has been liberalizing its economy, it has also gone through a crash course in the triumphs and tragedies of capitalism.

# **Coming to Terms** With Inflation

HINA'S economic growth has been remarkable. Its modemization program and vigorous export drives have produced annual GNP increases that would be heroic were it not for the relatively minor role that its economy plays in the global market. But the price of economic reform is now being paid, and it's an alarming one.

Inflation is running at a national level of seven percent, according to the Beijing government, but has been put as high as 20 percent in some areas by independent observers. Not only that, it is confronting the government with a political challenge as serious, if not as grave, as anything faced by the Western industrial powers in the 1970s.

Inflation has been inevitable in China's dramatic economic change of course from rigid central planning and control to widening free enterprise. Wherever wages and prices have been unsbackled. largely in the newly emerging consumer manufacturing and service industries, they have risen swiftly. The export boom, essential for the foreign exchange needed to bankroll the modernization program, has siphoned away consumer production and produced a fa-

errore to remediate which is

miliar inflationary trend too much money around and too little available to spend it

The relatively massive influx of foreign investment also vital to economic redevelopment --- has only aggravated the inflationary spiral. Many joint venture enterprises have had to pay premium and often overinflated saiaries, employee benefits, site rents and other costs to hungry local authorities - a problem which is only now being tackled to some extent with open-market employment policies in major centers like Shanghai and Beijing.

This free market inflation is giving the government a major social headache. In the major urban centers — Beijing for example, where an "official" eight percent bike in retail prices meant a drop in real income for nearly half the population last year - inflation is being cited as a prime cause of public discontent, and a dangerous one at that. With supreme irony, it is also blocking a crucial price adjustment program which will, in effect, bring even more inflationary pressure to bear on the con-

During the three decades of revolutionary rule, prices of many essentials and a range of

an ang mga katang palabatan Managpatèn pangkatang palabatan

Open market employment policies are being introduced in major centers like Beijing.

basic consumer goods were under strict government control in what would have contimed to be a classic system of socialist cost-of-living subsidization, had the whole system not swung onto the capitalist course. What has happened since then is that prices for many commodities have been completely out of tune with actual productions costs, and this has caused actual economic damage.

industry: it's been reported that because the retail price of sugar hasn't changed for the past 20 years, more than 40

percent of China's sugar mills have gone deeply into the red or closed down altogether, their production costs zooming way above their incomes. The same prospect threatens the crucial energy and steel industries. Western bankers, particularly, have warned that controlled steel and coal prices are so unrealistically low that it is impossible for these industries to become profitable.

Aware itself of the perils, Take the case of the sugar the government published an economic masterplan in 1986 earmarking price reform lifting controls and allowing prices to be dictated by market

forces — as one of its priorities over the next five years. The intention is still there, and is being promoted as a move essential to the developall too clear. ment of the economy, but the Pork prices have been in-

With prices rising all over the place, and with millions of people angry about it, this is no time to add to the inflationary spiral. In fact, the opposite has happened - controls have been stiffened on the rapidly

rising prices of some essential

consumer and industrial goods

and such basic commodities as

plan itself has fallen foul of

rampant free-market inflation.

meat, poultry, eggs and foodgrain for the pork industry. And another bitter implication of capitalism has become

flating because of a pork shortage, caused in turn by price controls and rising feed costs which have made pork production uneconomic. In order to offset public unrest, the controls will remain in place, at least for the time being. And for the pork industry, as indeed for almost every other major industry struggling to come to terms with

the new capitalist way in Chi-

na, this means that production will continue to lag behind demand, continuing to create the inflationary state of affairs that price subsidies are supposed to hold down.

Inflation is seen as a consequence of capitalism that China will have to live with until the essential antidote is arrived at - a level of economic production that exceeds or at least satisfies consumer demand. But radically increased productivity is what the modernization program is all about, and by China's own reckoning it will be at least the year 2000 before it can regard itself as anything approaching a modern society. And this confronts the economic helmsmen in Beijing with another inflation-based dilemma.

A prime example of the productivity problem is refrigcrator production in Shanghai. Last year, the demand for refrigerators topped 470,000, but the local industry could supply only one-seventh of that because of a shortage of imported key components. These parts were scarce because imports had been reduced. Why? Because of sharply rising prices. Infla-

This vicious circle encompasses each move in the productivity campaign. Much of the increased foreign investment and technology transfer, vital to the campaign to upgrade plant, machinery and in-

dustrial infrastructure, comes with an inflationary price rag on it. Worker bonuses and incentives mean increased production costs, and have a distinctly disreputable stain on them anyway - they've been too liberally distributed and taken too much for granted in

All this leaves Beijing's planners with little room for maneuver in their bartle to boost output, satisfy a domestic demand that is becoming increasingly bungry for consumer goods and at the same time make sure that the inflationary consequences do nor violently rock the social and political boat.

It's not the specter of an inflation rate sparking off serious social unrest that worries the government — by all accounts, it's felt that after the tumult and hardships of the Cultural Revolution the vast majority of Chinese have had enough of rage in the streets. What is far more worrying is the effect that continuing or sozning inflation will have on the delicate political balance of conservatives and progressives that has allowed the entire modernization and "open door" program to go shead. If inflation gets out of control it will strengthen, and to some extent vindicate, the hidebound revolutionaries in the political structure whose view of China's brave new economic course is that it will end in tragedy, not triumph.

# **Provincial Economy Mounts Export Drive**

₩ENTY years ago, the economy in Lizoning was not only the strongest in the northeast; it was one of the strongest provincial economies in all of

With less than 4 percent of the nation's population, and covering only 2 percent of its area, Liaoning accounted for about one-eighth of China's overall industrial production and produced 40 percent of its steel. Underlying these achievements were Liaoning's capitalization - very high by Chinese standards — and the province's wealth of readily

accessible and relatively unexploited resources.

Alongside an established infrastructure - which includes China's largest deepwater port and over 2,000 kilometers of double-track railroad — the province currently boasts the world's largest chrome products factory and is the world's leading producer of molybdenum and magnesite.

Yet Liaoning's products were, until 1985, largely des-

tined for the domestic market. It was China's open trade policy - followed by central government export incentives

Emirates, as well as a Liaoning Product Exhibition in Illinois - the province's sister state. Such moves have been accompanied by the introduction of new policies to liberalize export credential's criteria. and led to a seven-fold increase in the number of companies authorized to export.

Packaging, warehousing,

transportation and foreign local sources and from abroad trade base services have all witnessed rapid growth.

Exports have burgeoned. Currently valued at \$5.04 billion, they reach 10,000 firms

**Textile Turnaround** 

One of the industries that has benefited the most from this explosive growth is textiles. The China National Textiles Import and Export Corporation evolved from the pre-war silk trade. Basic raw materials such as wool and cotton were originally brought to the silk spinners of Lizoning for processing into threads and fabrics, but soon American plastics and Japanese polyesters were garnering great shares of even the local

China began exporting thread and textiles in the early 1960s. But as production increased in Japan and South Korez, the industry recognized the need to modernize. New equipment was bought from Italy and Japan; polyeswhen domestic demand proved too competitive. Wools were purchased from Australia and New Zealand and plastic peliers from the United States.

Today the Liaoning Branch exports over \$210 million worth of textiles to markets such as Europe, the U.S., Canada, Japan, Hong Kong, Australia and the Eastern bloc. Liaoning also ships yarns to Hong Kong, Macao and Japan; fabrics to Japan, America and Australia; wool to Eastern Europe and Hong Kong; and knitted fabrics to Japan, Italy, Hong Kong, Australia and Singapore.

The huge 30 percent jump in exports of metal products contributed greatly to the record \$110 million in exports achieved by the Liaoning Branch of the China National Metals and Minerals Import and Export Corporation in 1987. But, although the province has long been famous for its mining and metals exports, ter threads were found from it still holds great potential for

further export production.

Japanese rechnology and management provided the area with its first industrial platform as a basis for China's heavy industrial production. The Lizoning Branch was established in 1954 with the export of coal, coal byproducts and non-ferrous metals. But following further discoveries of mineral products and a concurrent need to diversify, the corporation developed new categories of export products.

The magazine Industrial Minerals has since renamed Liaoning "the Magnesite Giant," for over 60 percent of China's magnesite export now comes from the province. Over 350,000 metric tons of this important fertilizer were shipped last year.

The world's cosmetics, texriles, paper, soaps and ceramics industries also imported 350,000 metric tons of talc from Lizoning.

Other important non-ferrous metal exports include chrome products and titanium. With the world's largest chrome products factory, as well as other important factories in all major cities in the province, the corporation can afford to be highly competi-

Established in 1953, the China National Cereal, Oils & Foodstuffs Import and Export Corporation has seen some of China's fastest development of new products. From a tradition of exporting basic food products such as fresh and dehydrated fruits and vegetables, nuts and bulk scafoods and meats, the corporation has survived a revolution in systems and techniques including quick-frozen products, polypropylene bag and glass packaging, fish farming, mineral enriched foods, not to mention new management and

Although it contributes still only a small proportion to total food export production, even such new businesses as supplied material processing are not too revolutionary. Under a different "imported materials" trade caregory, abalone from Canada and Australia is purchased, canned and exported to markets in Japan.

marketing systems.

Today, with some 1.5 million becares of fish farming, total exports reaching an annual \$100 million, sales representatives in Hong Kong, Japan, Canada, the U.S., Europe and the East Block nations and, most important, a new competitive, even capitalistic, determination in its production and export marketing Lizoning is building a new worldwide reputation, The Future

MANAGEMENT OF STREET

# **Patterns of Trade**

THE emphasis on flexible trade — the processing of imported raw materials — is in the forefront of the changes to China's trade patterns. One of the clearest examples of this trend is the export garments industry, a spin-off from the traditional textiles industry. Mr. Liu Ji Mou, managing director of the China National Textiles Import & Export Corporation, Liaoning Garments Branch, points out that Dalian city is an old hand in the

Known as the "Garment City of China," Dalian and its environs have more than 10,000 workers involved in the export garments trade and, together with the province, ships \$100 million worth of men's, ladies' and children's cotton, wool and blended goods to markets in Japan, America and Europe.

The Liaoning Garments Branch of the National Textiles Import & Export Corporation involves somes 150 factories in its exports trade. It has been manufacturing gar-

ments since 1960, and until March 1987 was an arm of the Liaoning Textiles Branch. In the preceding years it developed so many new products and markets that its eventual independence was inevitable. Now, with a complete range of fabrics, its own creative team and overseas offices in Japan, the U.S. and Europe, the Garments Branch produces high quality finished garments from ladies' ensem-

bles to blazers and goose down

jackets.

# CHINA

# **Chemical Clean-up**

HINA'S chemical industries are corrently the target of a govconment clean-up campaign. And one of the most affected enterprises is the giant Sinochem. Founded some 38 years ago, Sinochem grew up in the industrial decades when China and the rest of the world were less concerned with ecology and more intent on building a solid manufacturing base. Sinochem succeeded. The

was being done to the environment and health of the province's chemical workers. Extensive research was begun to develop cleaner export products and assist international efforts to clean up the production and processing of essential chemicals. For example, the Lisoning branch of Sinochem is investigating ways to reduce the lead content of "Accelerator D." a chemical used in the processing of rubber.

Other moves include the introduction of packaged dyes and a whole new range of products to meet the demand for safer dyes. Because of restrictions on the export of some pharmaceuticals, Sinochem is greatly expanding its range of non-pollurant pharmaceuticals as well as developing entirely new down-line products such as rubber gloves for surgical use.

To market these new products overseas, the company's Liaoning beanch has offices in the U.S., West Germany, Thailand, Hong Kong and Ja-

port & Export Corporation's

Liaoning branch, with 200

manufacturing operations and

over 100,000 personnel, plays

a major role in the electronics

All kinds of heavy machin-field. Most of the Corpora-

ery and equipment - from tion's products, which range

mining and manufacturing from sophisticated electronic

machinery to tools and air- measuring devices to pocket

conditioners — are produced calculators, are exported.

The China Electronics Im-

mand, products are now being packaged and marketed in comprehensive sets. Overseas marketing teams from the Lisoning Branch of the China National Machinery Import and Export Corporation are studying international standards and working closely with clients to produce customized exports. Work skills and designs are being upgraded to make Liaoning machinery and machine tools as com-

This, in turn, has increased the demand for technology transfer and imported raw material. Raw products from Japan, the U.S. and Italy are high on the list of priority

chinery and agricultural machines, to hand tools, electronic implements and major international tenders.

The drive to expand international competitiveness and to put China on an equal basis with its world trading partners has brought fundamental changes to this industry. Highly market-responsive and technology-sensitive, it has extended its product base into new areas. One of the keys to this development has been the injection of technology at every step. Traditional products such as the simple bench vise, sold for decades, are being transformed into heavy-duty. multi-purpose rools for domestic and industrial use. When Lizoning does not have the technology, it goes our to buy it. An investigatory group to the United States recently purchased U.S. tooling equipment and patterns for the development of a new range of socker wrenches.

In response to market depetitive as those from the U.S. and Japan.

# The Dollar's Rebound s Bringing Little Cheer

By CARL GEWIRTZ

ARIS — The dollar hit a seven-month high last week. But instead of spreading cheer that the long decline from the 1985 peaks may finally have run its course, foreign officials grumbled, bond markets tumbled and analysts varned that it was all a jumble - that by year's end, the dollar ould again be under attack

The grambling was provoked by fears of inflation. As the tollar rises, so does the cost of imported raw materials in West lermany and Japan. Most of these are priced dollars and most, acept for oil, have been inreasing sharply.

To put a number on it. conomists at the Organizaon for Economic Cooperaon and Development estihate that a 15 percent poreciation of the dollar— heady up 11 percent from its 388 low at 1.75 Deutsche

West Germany and Japan start to worry about imported inflation.

earks - would raise consumer prices in Germany 0.4 percent in he first year and 0.8 percent by the second year. That's substan-al, given that the year-to-year price rise in May was only 1.1

Add to the translation effects from dollars into marks (or yen) as fact that the cost of goods is also rising in dollar terms and the hospect of imported inflation appears great. On top of that is the instant worry of faster domestic inflation, the result of aboveriget growth in the money supply during the past two years.
One response to both problems is for central banks to sell pilars, which caps the dollar's tendency to rise and also reduces ie volume of local currency in circulation. There's another mefit: Dollar sales create room for the central banks to resume nervention to support the dollar when it comes under attack. Analysts expect the West German central bank could really art to unload dollars if the rate climbed past 1.76 DM. So far, les have been modest, estimated at about \$6 billion in recent eeks. But they have not stopped the appreciation of the dollar, hich has gained some 3 percent since the last week of May, ving credence to reports that the Bundesbank will shortly raise oney-market rates by a quarter-point.

VEN long-time critics of West Germany's timid growth policy are urging a rise in interest rates. Rimmer de Vries, Morgan Guaranty's economist, said last week that this was te ideal moment for the Bundesbank to raise money-market ites. He said that the aim should be to drive the dollar down to 55 DM, a 13 percent appreciation for the mark.

Mr. de Vries said that earlier concerns about slow West erman growth have been superseded by faster-than-expected pwth in the seven major industrialized countries, now running about 4 percent, he estimated. This is sufficiently robust not to Par Speed to worry about any slowing in West Germany resulting from modest increase in short-term interest rates.

... The Japanese last week did some snugging up of rates and that, coupled with the expected West German move, sent bond prices all markets skidding, as investors assumed the United States ould be obliged to follow.

The Japanese have been more successful than the West Gersans in holding their currency in a narrow range, about 121-131

The Bank of Japan is reported also to have been lightening up n its dollar holdings, but in a less obvious way than the undesbank. The Bank of Japan reportedly lends dollars to omestic kinametal institutions, which then sell the dollars for the but until the central bank is repaid in yea, the dollars appear

At the same time, Japanese manufacturers remain big earners ad sellers of dollars — an element missing in West Germany seping a tighter lid on the exchange rate.

But the dollar's current strength is not regarded as sustainable. rendan Brown, County NatWest economist, said the strength 'as "an exaggerated response" to the robust U.S. economic bowth: the recent modest rise in short-term interest rates; and 'e decline in the U.S. trade deficit for April to \$9.9 billion, the

Mr. Brown said he doubted the dollar's improvement could be aintained. He sees "no further improvement" in narrowing the ade deficit in coming months, as the high level of U.S. economic tivity will sustain demand for imports.

# **Beef Pact Could Be** In Sight

## U.S.-Japan Talks Make Progress

Compiled by Our Staff From Dispatcher TOKYO — Japanese and U.S. negotiators are likely to resolve a long-standing dispute over beef and citrus imports to Japan on Monday, Japanese officials said Sunday.

The officials said on Japanese television that the U.S. trade representative, Clayton K. Yeutter, and Japan's agriculture minister, Taka-shi Sato, would have a third and final meeting on liberalizing trade in the commodities on Monday

The second of two meetings be-ween Mr. Yentter and Mr. Sato on Sunday produced an understanding on Japan's provisions for emer-gency beef-import curbs, a Japa-nese Agriculture Ministry official said on Nippon TV.

These provisions had been the major obstacle to an agreement. With that matter resolved, the two sides accepted an outline expected to be fleshed out and signed Monday, the officials said.

Reports on NTV and on the government's television station and by Japan's Kyodo news service all quoted only Japanese sources as saying an early agreement was expected.

After the first meeting, Mr. Yeutter had described the negotiations as not very productive, saying that "several obstacles" remained in the way of an agreement.

Sources in Tokyo said the United States had proposed earlier that Japan liberalize U.S. beef imports in three years, with the United States allowing Japan to impose emergency controls for two years after liberalization. Japan argued that the time limit would pose a threat to its farmers and insisted that emergency curbs be perma-

Under the fiscal 1987 quota ac-cord, which expired on March 31, Japan imported 214,000 tons of beef, 126,000 tons of fresh oranges and 8,500 tons of orange juice from the United States.

Washington has been demanding full liberalization of Japanese beef and orange imports. (Reuters, AFP)

# A Modest Recovery Begins in Texas

**Improvement Omits Banking and Real Estate Sectors** By Thomas C. Hayes

Local Governments: Fiscal Instability Beyond Washington

New York Times Service In the shadow of the spectacular boom-and-bust cycles of its oil and real estate markets, Texas is beginning a modest but unmistakable economic

recovery, analysts said. Although its financial institutions and commercial real estate sector continue to face turmoil, other areas are fashioning a recovery from the worst economic slump in the state since the De-

The turnaround has been fashioned out of steady oil prices, a shift to electronics and high-technology manufacturing, small-business growth, a healthy farm and ranch sector, a growing population and the improved outlook for U.S. exports because of the weak dollar.

"We are seeing slow, steady improvement that is sustainable and also laying the base for a much broader economic rebound," said Bernard L. Weinstein, director of the Center for Enterprising at Southern Methodist University in Dallas. To be sure, Texas must overcome the calamity in

its financial institutions, which had losses of \$20 billion in capital in the past three years, mainly because of major errors in oil and real estate

A deepening crisis in real estate threatens to plunge the state back into recession if there is no reduction in the \$15 billion in foreclosed property held by banks and savings institutions in the state.

Yet, by most accounts, the state's economy has been on an upward swing for several months. M. Ray Perryman, head of the Baylor Forecasting Service at Baylor University in Waco, said he believed the overall economy was enjoying a "sig-nificant" recovery, although the financial and real

estate troubles are hardly over. Mr. Perryman warned that the improvement;

cut in spending, as well as tax in- tain the nation's infrastructure.

could be reversed by a drop in oil prices, a sudden rise in the dollar or a national recession. But he said he expected the Texas unemployment rate, 7.3 percent at the end of May, to fall to about 6.5 percent by the end of 1990, while the national rate rises. The national rate was 5.6 percent in May.

Texas gained 65,400 jobs in the 12 months and in a hard secretary to the federal Purseus of

ending in April, according to the federal Bureau of Labor Statistics, and rising personal income is a promising economic trend. The income rise has trailed the national average since 1982 but almost drew even in late 1987, the Commerce Department

Many economists said the broadening of the Texas economy means it will more closely track that of the entire United States.

"Ten years from now, the Texas economy will look very much like the national economy," said James L. Cochrane, chief economist at Texas Commerce Bank in Houston. "It will never be average because of some special characteristics. But a diversifying trend has been under way for 10 years, and it will continue."

There are signs of health. The Dallas-Fort Worth area ranks third, after New York and Chicago, in a national listing of corporate headquar-ters. Texas is third, after California and New York, in the number of scientists and engineers. By 1990, it is expected to pass New York to trail only California in population.

David L. Birch, a specialist in small-business development at the Massachusetts Institute of Technology, said five Texas cities rank among the top 25 in the nation for newly created businesses. These cities responded to adversity with new starts and new attempts to be entrepreneurial," he

# **Fed Study Finds U.S. Goods More** Competitive

NEW YORK — Several factors have combined to increase the competitiveness of products made in the United States, and further improvements are likely, the Federal Reserve Bank of New York said. The New York Fed cited a weak dollar, wage restraint, and im-proved productivity and quality for

and continuing efforts to improve productivity and quality are fore-seen at least through the end of the

decade, the report said. "U.S. manufacturing has clearly

become more competitive in recent years," according to the report.
"This achievement was the result of sharp dollar depreciation, wage restraint and strong improvements in U.S. productivity and quality performances," it said.

"Over time, these positive trends should lead to greater U.S. competitiveness, with a concomitant decline in the U.S. foreign trade defi-cit and improved job opportunities and compensation for manufactur-

industry groupings" in the 1980s. More Slowly steel, electronic parts, pharmaceuticals, construction equipment, consumer electronics, machine tools, electric power generating equipment, textile machinery and general aviation aircraft.

The report estimated that "the typical U.S. factory spends 20 to 25 after they have been shipped from Trends survey.

industry, a major producer facing quality problems, has launched a concerted drive to boost its quality

reputation," the report said.
In addition to quality improvement and the weaker dollar, the report attributed growing competitiveness of U.S.-made products to "restrained wage growth." This, it said, "has also been very important

proved productivity and quality for the increasing competitiveness of U.S. goods. Its findings were contained in a report for release Monday.

The full impact of the depreciation of the dollar, however, will not be felt until the end of next year.

Said, "has also been very important for improving the relative U.S. price position."

Other factors contributing to the better U.S. price and quality position were "investment levels, technology efforts — spurred by research and development expenditures - industrial restructuring and, to a more limited ex-

tent, work reorganization."
The renewed U.S. research and development efforts suggest a continuing boost to competitiveness over the next several years," the report said, noting that the "gestational lag between expenditure on research and development and the initial returns on that expenditure is about two years.

Premier Franz Josef Strauss of

percent interest over 16 years

Friedhelm Ost, a government spokesman, said Bonn was not involved in setting up any credit for East Germany. It was "a question for the banks alone," he said.

Der Spiegel, in its story made available before publication on Monday, said Lufthansa will also train East German pilots on the Airbus planes.

Diplomatic sources in Paris said Lufthansa would provide all servicing on Interflug's new Airbus "In the next 14 days, a contract the Paris-based Western body that the West German state of Bavaria, planes to avoid the risk of sensitive with the East German company monitors high-technology exports, who also is chairman of Deutsche technology being used for military Interfing on delivery of three Air- last week gave permission for the Airbus GmbH, the German mempurposes.

# Pose a Problem For Taiwan

Chinese Bonds

TAIPEI — Taiwan's govcrument has been confronted with a potentially crippling problem: It is being asked to redeem bonds issued more than 40 years ago in China.

Taiwanese visitors to China are returning with stacks of bonds sold on the mainland by the Nationalists before they were driven to Taiwan by the Communists in 1949.

Financial officials say tens of billions of dollars worth of bonds were issued in the final years of Nationalist rule, when the country was locked in civil war and ravaged by inflation.

Some of the bonds are in private hands and some were seized by the Communists during the war. If they were all cashed in, Taiwan would be bankrupt, officials say.

Taiwan has refused to rec ognize the bonds brought back since a ban on travel to China was lifted last year. Officials said they were worried that Beijing may also seek pay-

Taiwan would "seriously consider" repaying the bonds if the Nationalists return to power in Beijing, an official

# JERSEY-BASED INVESTMENT. HIGH INTEREST, NO STRINGS ATTACHED.

The Halifax, the World's biggest building society has set up a high interest, no fuss investment opportunity in the Channel Isle of Jersey.

Called HALIFAX DEPOSIT INTERNATIONAL it's a sterling based deposit account open to all those

not ordinarily resident in the UK. If this includes you, then your investment can start with a minimum of £1,000 at the substantial

rate of 7.75%. From there the interest rate rises on the whole investment as your balance steps up as follows:-

AMOUNT	INTEREST RATE	C.A.R.
£1,000	7.75%	7.90%
£10,000	8.25%	8.42%
£25,000	8.75%	8.94%
£50,000	9.00%	9.20%

If adding or withdrawing money alters your balance band, the interest rate is automatically adjusted.

Your interest is paid gross without tax deducted, and is added twice yearly. So if you leave your full interest intact for the whole year you will receive a higher compounded annual rate (C.A.R.\*).

Unlike some other accounts there is no minimum time limit for your deposit, and you can have instant access with no penalties. You're even entitled to standing orders and direct debits.

Opening the account is just as fuss-free. Simply send us a cheque. We'll then send you all the relevant documentation, or if you would like more information telephone Jersey (0534) 59840.

They say time is money. A little time sending in the coupon now will be time well spent for the future.

	heque/money draft no (minimum deposit £1,000)
for	(minimum)

# LOCAL: Fiscal Instability in the U.S. Is Extending Beyond Washington

V. Regan, New York's comptroller. For economists, fiscal analysts and local officials, these developments are the most visible symp-toms to date of mounting budget nunities, especially those in the oilproducing states of Texas, Louisiana and Oklahoma, have had problems for awhile, but the new constraints are not a product of

regional economic setbacks. Instead, experts cite rising ex-penditures at the local levels at a time when the Reagan administratime when the recagan automista-tion is sharply reducing contribu-tions. There also have been stiff cutbacks in aid to mass transit and housing. The state and local gov-ernments have not curbed spending, but instead absorbed a greater share of the financial burden to

keep programs alive. Moreover, local officials are expanding services into new areas such as day-care, even though Washington has been reluctant to participate. Last year, total expenditures rose \$45 billion, while grants-in-aid from Washington declined \$3.5 billion, according to the Commerce Department. "It's a common complaint. You

here it all the time," said Robert
Freeman, a professor of government accounting at Texas Tech
University in Lubbock. "Local officials believe the federal government is trying to balance the budget on their backs."

In ance Officers Association, which
has members from 11,000 state and
local governments, estimates that
this arbitrage earned local governments an extra 10 percent.

To meet these mounting pres-

clear purpose, the rules have sent the entire market into a slump.

As a result, new issues will total no more than \$100 billion this year, about half of 1985, according to that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if that are going to be in deep water if the solution in year. about half of 1985, according to George Friedlander, head of mu-nicipal bond research for Smith Barney, Harris Upham & Co.

"Some of the new regulations are so complex that many communities don't have the staff or expertise to understand them," he said.

Tax reform has removed the exempt status for entire categories of borrowing, such as industrial de-velopment bonds and pollution control, and it has imposed statewide quotas for certain borrowing, such as housing and waste manage-

Moreover, bond issuers are now required to spend their proceeds within six months. In the past, local governments reinvested the money using the income to lower their borrowing needs. The Government Finance Officers Association, which

tock prices showed little change

during the week after drawing strength from the U.S. trade figures but slipping on lears of inflation.

The Financial Times 100-share index ended the week with a modest 0.3-point gam to 1,850.1. The 30-share industrial index rose 4.2 points to 1,472.6.

After a rise spurred by the U.S. trade report on Tuesday, the market gave back most of its gains. Several economic indicators on Thursday — which included re-ports of higher earnings, increases in industrial production and retail prices and an upwardly revised trade deficit - revived fears of inflationary pressures.

# **Test of So-So Teams**

By Ken Denlinger

INGLEWOOD, California -By Sunday night, something monumental in professional basketball would have taken place - either the Los Angeles Lakers moving closer to becoming the first repeat champions in 19 years or the De-troit Pistons winning the National Basketball Association title for the first time ever.

Too bad neither team is especially good.

That's speaking historically, of course, for nobody who endures 82 regular-season games and then throws a victorious fist aloft after nearly two months of playoffs is lousy. Whichever team wins will be a worthy and deserving champion.

Still, near-unique moments such as these spawn tough questions. Such as: In the sweep of pro bas-ketball majesty, where will these Lakers and Pistons rank? Not particularly high.

#### Lakers Tie Series

Compiled by Our Staff From Dispatches

INGLEWOOD, California -The Los Angeles Lakers beat the Detroit Pistons, 103-102, Sunday on Kareem Abdul-Jabbar's two free throws with 14 seconds left, forcing the National Basketball Association's championship series to a seventh and deciding game that will be played here Tuesday night.

If the Lakers prevail, their problem will be comparisons with themselves, past and present. Five titles in the 1980s, and counting, is Boston - awesome. The only other non-Celtic team with any sort of decade dominance was not the Magic Johnson Lakers but the George Mikan Lakers, in the '50s, when they were in Minneapolis.

Until March 10, this gang of Johnson's was as fine as anyone had ever seen. He and James Worthy and Kareem Abdul-Jabbar had combined for two titles already and were 49-10 at the time. Then Johnson reinjured his right groin muscle — and the Lakers have been strug-gling since. Without him for 19 sweeping San Antonio.

They still have not lost this season when their jerseys were pinned flat against the backboard.

A Los Angeles survival would be accomplished by no better than the

third- or fourth-best Laker team of the '80s, but with such age and lack of depth, folks here have come to expect a basketball Oscar each year. Johnson led the Lakers to their

first championship of the '80s, with a 42-point, 15-rebound, 7-assist performance as the center replacement for Abdul-Jabbar against Philadelphia. Every team since has been molded around Johnson. He has made jump shooters like Byron Scott and swift rebounders like A.C. Green lots better than they

So far in these playoffs, the Lakers have created a burden too heavy even for Johnson. A 41-year-old scoring 11 more points than any of his teammates, as Abdul-Jabbar did in Game 5, is an accurate ba-

rometer of doom.
The Pistons? No one is quite sure yet what to make of them. More than anything else, they are a team of the '60s one victory shy of win-

ning a title in the late '80s. What's special about them? Who, years from now, will be recalled with great affection? Like the Lakers, the Pistons are competing against chosts — the 1980s Celtics.

Part of the reason for the Laker-Celtic matchups the last four years being so thrilling was that at least one phase of basketball seemed to be taken to a new level. Larry Bird, Kevin McHale and the vastly underappreciated Robert Parish was the best front court ever in the

With Johnson, who redefined the point-guard position, the Lakers were the ultimate in speed and grace. They even had enough depth to play trench-ball against the Celt-

ics in the 1985 finals. You look at the Pistons and see a 6-foot-5 (1.95-meter) player, Adri-an Dantley, comfortable close to the basket and a near-7-footer, Bill Laimbeer, getting most of his

points on long-distance shots.

Isiah Thomas is — fast, a fine

Dantley is the pivotal Piston, and true throwback - front-court players in the 6-5 range have been extinct for some time, haven't they? If the NBA kept hockey-like statistics. Dantley would have lots more

# Senna Wins In Detroit;

beat continued for Ayrton Senna and the McLaren-Honda team as the Brazilian overwhelmed teammate Alain Prost and the rest of the field in Sunday's Detroit Grand Prix Formula One race. Senna drove to his third straight victory on the dicey downtown circuit, as well as his third triumph of 1988.

Coming off an easy victory in the Canadian Grand Prix a week earlier, Senna, 28, easily outdistanced Frenchman Prost. the two-time world champion who has won this season's other three races. It was the fourth time this year that the McLaren tandem has finished one-two.

Driving conservatively in the final stages of the 63-lap, 157.44-mile (253.45-kilometer) event, Senna beat Prost to the finish line by 38.713 sec-onds. Senna had led by 60.368 seconds with six laps to go. Prost still leads Senna in the

season point standings, 45-33. Third place Sunday went to Thierry Boutsen of Belgium, whose Benetton-Ford finished more than one lap behind. Andrea de Cesaris of Italy, in a Rial-Ford, was fourth.

Only nine of the 26 starters were running at the end of the attrition-filled race. The asphalt track was particularly slippery with temperatures in the mid-50s centigrade (high 80s Farenheit), and tire wear was a problem because of concrete patches in the racing sur-

ctory since May 18. The Indians d scored just two runs in each of e five losses in his streak.
The Indians made it 6-3 in the nh on Julio Franco's run-scoring agle and a bases-loaded wild teh by reliever Tim Stoddard, 30 walked five of the eight batters : faced.

It became 11-3 in the seventh sen Stoddard walked Dave Clark four pitches with the bases loadto force in a run and Allanson Charles Hudson's second pitch his fourth homer this year. Bine Jays 6, Tigers 4: In Detroit,

ise Barfield drove in three runs th his second homer in two games. n broke a 4-4 tie in the minth with wo-out RBI single for Toronto. Red Sox 15, Orioles 7: In Balti-

re, Marty Barrett got four of ston's 23 hits, the most in the nor leagues this season, and ike Greenwell drove in five runs ring the rout. White Sox 5, Brewers 0: In Mil-

mkee, Dave LaPoint pitched a ee hitter for his first victory we May 14 and Daryl Boston's o-run homer helped Chicago ding Tom Filer's 12-game, six-... ir winning streak.

Angels 5, Royals 0: In Kansas by Missouri, Wally Joyner and hnny Ray each drove in two runs ale Mike Witt, who allowed eight s in 8% imnings, stretched his weless streak to 21% innings as lifornia swept a three-game ses in Royals Stadium for the first \*\* since 1979.

Mets 6, Phillies 0: In the Nation-League, in New York, David ne pitched 7% bitless innings d finished with a two-hitter nnst Philadelphia.

With one out in the eighth, Cone Phil Bradley with a pitch and, e out later, Steve Jeltz's soft line ve into shallow center field endthe no-hit bid. The only other hit

shutout this season, which lowered his earned-run average to 1.65, second-best in league.

Pirates 3, Cardinals 2: In Pittsburgh, Bob Walk outpitched for-mer teammate Larry McWilliams and Andy Van Slyke tripled in the go-ahead runs against St. Louis in the eighth inning. Walk allowed four hits in 8%

innings to win the for the fourth time in his last five decisions. He has allowed only one run in his last two starts and only two runs in his last three. McWilliams allowed the three runs and six hits in eight innings. He was cut by the Pirates in April 1987.

Astros 6, Braves 4: In Atlanta, Craig Reynolds, Denny Walling and Terry Publ each hit run-scoring singles in the eighth, off relief ace Bruce Sutter, to rally Houston.

Giants 5, Reds 3: In Cincinnati, Mike Aldrete hit a three-run double during San Francisco's fourgninai bridt ann

Cabs 9, Expos 3: In Chicago, Andre Dawson homered, tripled, doubled and drove in three runs to help sweep the three-game series

In the third inning Saturday in Cleveland, New York's Rickey Henderson went high to rob Joe Carter of a home run, left: two innings later Henderson went low to avoid the sweeping tag of catcher Andy Allanson. The Yankees defeated the Indians by 6-3.

# Maddux Wins No. 12 by 5-Hitting Expos

CHICAGO — Greg Maddux, the 22-year-old called "Batboy" by Chi-cago Cub teammates because of his boyish looks, Saturday became the major leagues' first 12-game winner of the year with a five-hit, 3-0 victory over the Montreal Expos.

SATURDAY BASEBALL

right now," said the Cubs' manager, Don Zimmer. 'They all know what he's done. It's not a matter of

luck. This guy's just pitched great."

Maddux, 12-3, who is an unimpressive 6 feet (1.82 meters) and 150 pounds (68 kilograms), pitched his third shutout and fifth complete game of 1988 by holding the Expos to five singles and one intentional walk. He struck out five, including Andres Galarraga, the National League's leading hitter, three times.

Having gone 6-14 last year, he said "it feels good, but it's only June. It would be nice if it was

one game..."
Chicago took a 1-0 lead in the

second, when Vance Law hit a linedrive single that scored Ryne Sandberg, who had walked and moved to third on a single by Mark Grace. It became 2-0 in the third when Rafael Palmeiro doubled, increas-"There's nobody that's going to take this guy lightly in this league ing his league-leading total to 23, went to third on a passed ball and scored on Andre Dawson's double. Dawson's single in the eighth ac-counted for the final run.

Dodgers 3, Padres 0: In Los Angeles, rookie Tim Bekcher and two relievers held San Diego to five hits and Jeff Hamilton and Kirk Gibson homered as the Dodgers ended a three-game losing streak. The Pa-dres had won eight of their last nine, and five straight over Los Angeles.

Cardinals 6, Pirates 3: In Pitts-burgh, Willie McGee got two hits, stole two bases, drove in two runs and scored twice to help send the Pirates to the third straight loss.

Reds 3, Giants 2: In Cincinnati rookie Chris Sabo homered, tripled

and doubled twice, scored two runs

son held San Francisco to five hits against Toronto and Pat Sheridan for eight imnings.

for eight innings.
Mets 3, Phillies 2: In New York, Gary Carter's sacrifice fly and Keith Miller's two-out, bases-loaded infield single, following two in-tentional walks in the 14th, beat Philadelphia as shortstop Steve Jeltz could not get the ball from his glove in time to get an out.

Astros 14, Braves 7: In Atlanta, Glenn Davis hit his league-leading 17th homer during Houston's nine-

Red Sox 5, Orioles 0: In the American League, in Baltimore, Roger Clemens pitched his sixth shutout this year and Dwight Evans drove in two runs for Boston. Clemens raised his road record to 8-0, striking out nine to run his major-league-leading total to 149. Yankees 6, Indians 3: In Cleve-

land, Don Mattingly tied the score with a two-run double and Dave Winfield's two-run home run capped a live-run fifth as New York ended a three-game losing streak. Tigers 6, Blue Jays 1: In Detroit,

double. Terrell struck out two and walked one for his first victory since May 22. The only hits off him were Nelson Liriano's singles in the first and fourth and Jesse Barfield's twoout home run in the eighth.

Athletics 2, Rangers 1: In Oakland, California, Ron Hassey sin-gled in Luis Polonia, who had singled and stolen second in the 13th, as the Athletics beat Texas in a second straight extra-inning game.

Angels 6, Royals 3: In Kansas Angels 6, Royals 3: In Kansas nervous tomorrow morning, And City, Missouri, Johnny Ray and rightfully so. If we didn't we Brian Downing singled in runs during a three-run ninth that rallied Twins 6, Mariners 2: In Minne-

Strange Leads Open by 1

BROOKLINE, Massachusetts -Curtis Strange, whose five victories in the last year have given him the best current record in professional golf, made a move Saturday toward winning one of the sport's major tournaments, the 88th U.S. Open. in the next major championship, the British Open, July 14-17, but

ا هكذا من الرجل

Despite a struggle over the last three holes, two of which he bogeyed before a marvelous save of par out of a bunker at 18, the 33year-old Virginian held on for a one-stroke lead going into Sunday's final round. Right behind him were Nick

Falco of England, who won the 1987 British Open; Scott Simpson, the defending U.S. Open champion who had led after Friday's second round and Bob Gilder, a deternined man who has remained high in the field for three days.
"I feel good," Strange said.

"Anytime you're leading going into the final round you have to feel good. Means you're doing something right."

Among the things he did right on The Country Club's 7,010-yard (6,402-meter) Open course was to shoot three-under-par 32 on the front nine and take over the lead with a birdie on the par-5 ninth. Strange went on to complete his round in two-under-par 69 for a 54hole total of 206.

But he had let a three-shot lead diminish to only one stroke with a bunkered tee shot at No. 16 and three nutts at No. 17.

Gilder, who suffered with a double-bogey 6 on the 15th hole, came in with a 70 for 207, while Faldo shot 68 and Simpson carded 72 to lose the lead he held for a day.

D.A. Weibring, who has had a stomach flu this week, and Larry Mize, winner of the 1987 Masters, were another shot back at 208. "It's hard sometimes when your

body is telling you to lay down and here you are in an important golf tournament," Weibring said. Strange, speaking of the final round, said: "We'll all feel a little

but that's what it's all about." Strange, among the pretournament favorites, is seeking his first apolis, Tom Herr had three hits and triumph in one of the four major pro championships: the Masters, the U.S. and the British opens and the PGA Championship. P.J. Boatwright, one of those officials, ordered a suspension of play three best golfers in the world, had

that lasted for 1 hour, 5 minutes. Once play resumed, Strange twoputted to par the difficult par-4 hole with the blind second shot over a 50-foot (15-meter) cliff to a tiny green. At the par-5 14th, he made a poor drive left into a bunker but got a birdie when he rolled in an 18-foot putt. He did that just seconds after Gilder had dropped a 27-foot birdie putt to tie Strange

Rain began as Gilder took his double bogey 6 on 15, which put Strange again ahead by three.

Faldo got even with Gilder by sinking a bird on the last hole and Mize birdied 17 to get into that three-way tie for second.

But Strange lost his chance to have a real grip on the title when he blasted free of a bunker on the par-3 16th and needed two putts to get down. His lead was cut by another shot when he lipped out a two-foot second putt on No. 17.

His approach at No. 18 landed in the bunker fronting the green, so he had to work out of that sand for the third time in three days. He got his par by sinking the one putt for the second straight day.

"I've been in that bunker all three rounds so I know it inside and out," Strange said.

On Friday, Simpson had shot a course-record 66 and tied an Open 36-hole mark of seven under par as he took a one-stroke lead over his friend Mize.

But Sandy Lyle of England, who shared the first-round lead with Gilder and Mike Nicolette, started strongly, then took three bogeys on the back nine to finish with 71-139. That tied him with Faldo, who shot 67. Nicolette faded from contention with 73 Friday, then 77 Saturday.

Lyle began the second round as if he would take command, rolling in a 10-foot comeback putt to save par at the second hole. He did even better on No. 3, sinking a 60-foot birdie putt from the front fringe. Birdies at No. 4 and No. 9 got him to six under for the tournament. At the 11th, after he hit his approach shot too far and had to chip back to a green falling away downill, his ball slid 20 feet by the cup but he holed the putt to save par.

His luck changed when he missed a six-foot par putt on 12, then another at 13. He bogeyed the 18th when he drove into the left rough. And Saturday, he fell further from contention by carding 75.

LONDON — There's a musical playing here called "Winnie." about Churchill's first two years as Prime Minister at the outset of World War II, Throughout, Churchill uses the word wow, having picked it up on a trip to America. When he is really pleased or excited

mouth and says, "Wow!" For much of the last two years. tennis has been lacking in wows. It has mainly been Ivan Lendl and Mats Wilander slugging away endlessly from the first to the last, and Steffi Graf relentlessly closing in on Martina Navratilova and Chris Evert with no one even close to those three.

The exception has been Wimbledon. It was Wimbledon three years ago that produced the miracle of Boris Becker, the 17-year-old prodigy coming from nowhere to become the youngest champion in 99 years of tennis here. It was Wimbledon that in the last two years has produced Becker's dramatic defense of his title, Pat Cash's superb victory of a year ago and Navratilova's continuing drive for a record nine wom-

en's singles championships. On Monday, everyone comes back to Wimbledon and the potential for two weeks of wows is evident. The men's field is frought with potential and question marks and, although the women will probably be reduced in the end to a Graf-Navratilova rematch, that final alone could give the women's tournament enough magic to last a year.
It will be Cash who gets the first

moment of glory when he plays the traditional opening match Monday afternoon as the defending men's champion against qualifier Todd he blew Lendl away in the final in February should be declared unhere. Cash has been a spotty player. He lost in the first round of the U.S. Open but came back to beat Lendi again in the Australian Open

thing is contrived."

McEnroe played five exhibition matches last week, two in Dublin and three in Liverpool and looked all right but not that sharp. "I still have some work to do to really be ready," he said after losing to Christo Van Rensburg on Friday. "But so far I feel pretty good and Management Council, continued

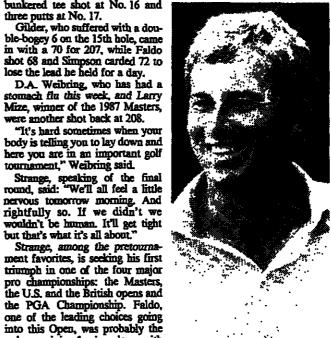

things have gone well. The most excited person at the end of the week was Navtatilova. She easily won the Eastbourne warmum for the sixth time in seven years, gaining a small measure of revenge for her French Open defeat on Saturday with a 6-2, 6-2 victory over Natalia Zvereva. Navratilova is shooting for a seventh straight title and a record ninth championship this year and will probably have to beat her oldest rival. Chris Evert in the semifinals and her

toughest rival, Graf, to do it. Like Wilander on the men's side, Graf is halfway to a Grand Slam, but her chances are taken far more seriously because she has so few obstacles to overcome. Realistically, she shouldn't face any threat until a possible quarterfinal against either Hana Mandikova or Manuela Maleeva. Maleeva hates grass and Mandlikova hasn't been healthy for over a year. Graf's semifinal mat-chup will probably be against either Pam Shriver, who left Eastbourne with an injury, or Gabriela Sabatini,

who is struggling these days. So Navratilova, as tough a player as there has ever been here, looks like the only real danger. "I definitely think I have a good chance to win this year." Graf said. "Last year I didn't even expect to make the final. When I lost there, I didn't even feel that bad. Something was missing. This year I really want to win."

She isn't alone. Navratilova has made this tournament a crusade; Evert would like one last moment courtroom that new face-to-face of glory; Lendl would give up two bargaining wasn't likely. "There is of his open titles for one of these; Becker wants revenge for last year; Cash wants to defend; McEnroe wants to make a major comeback; Connors is still Connors; Wilander has a chance at a Grand Slam until someone beats him; and, who knows, maybe someone from Britain will win a couple of matches.

No tournament in the world has owners, said: 'It's a long process. the umpredictability of Wimble-There's going to be an appeal either don because of the grass, the setway the judge decides. It's still just ting and the stakes. Were Churchill here, he might even say, "Wow!"

until he encountered the giant Mekong catfish while serving as Britain's ambassador to Laos in 1975 and resigned from the diplo-matic service to become a food Democratic Party." scholar, publisher and founder of the Oxford Symposium, which may not have the Whirling Dervishes that are a feature of the renowned Konya food sympsia in Turkey, but which offers its own

"Last year there was a terrific fight between an Australian and a Canadian about medieval thickeners," Mr. Davidson said. This year's symposium, later this month, will have as its theme "The Cooking Pot," with emphasis on eathernware, although copper and iron will, after much discussion,

utilized sea slug.

"How could they have been over-

looked for so many years?"

Mediterranean giant sea slugs, he says, are less ugly than the Orien-

tal. "In a way they're rather attractive, like knobbly whitish cu-

Mr. Davidson was a diplomat

Mr. Davidson's talk to the frozen food folk, illustrated by fresh fish from the Nice market, had as its point that nearly all the typical "Mediterranean" fish, including even the rascasse, can be found in other waters and therefore authentic Mediterranean dishes can be prepared, and frozen everywhere. But recipes should be authentic, unlike the American recipe for bouillabaisse that says take a can of tomato soup and a can of pea soup, heat in a double boiler and serve.

"It had no fish at all in it," Mr. Davidson said.

After he wound up, the audience was invited to taste platters of Mediterranean dishes that had been prepared according to Claudia Roden's recipes: couscous, lamb stew with dates and apricots, Greek stifato, pilat with spiced meatballs and pistachios and pine nuts, bourride, risotto, paella,

head mike like a 1920s flapper's headache band, suggested the au-dience think of freezing the under-"They are absolutely deli-cions!" Mr. Davidson exclaimed-Kramer column in U.S. News &

World Report.

"Jack Germond produces a self-described 'inside baseball' syndicated political column," writes William Prochman in The Washington Post, "with his partner, Jules Wit-

A couple of years ago, Tom Oli-phant of The Boston Globe said that the columnists Rowland Evans and Robert Novak had been "marvelous on the inside baseball of the

"The people in my state," said Richard Weiner, chairman of the Michigan Democratic Party, "are interested in jobs, the economy and education. The rest is inside base-The phrase has been used out-

side baseball for at least a decade. Senator Edward M. Kennedy wrote Myra MacPherson in The Washington Post in 1978, "chairs endlessly boring hearings then cuts through testimony with inside baseball jokes that no visitors understand but laugh at anyway."

The meaning of the phrase can best be ascertained from a brief study of its origin. In "Funs Floaters and Fork Balls," a 1987 baseball dictionary, Patrick Free-lano defines the term as "The style of play in which the offensive team tries to score one run at a time through such tactics as the bunt, the steal, the hit-and-run, the wellplaced hit and the squeeze."

The Baltimore Orioles of the

1890s perfected this type of play: the baseball was then "dead," in contrast to the livelier ball of today, and usually traveled short distances even when a batter connected squarely. Wee Willie ("hit em where they ain't") Keeler of Baltiwhite this and the recent of hard-more was an exemplar of made baseball, now frequently called sci-entific baseball; by the 1920s, along came Babe Ruth, then the livelier ball and a more wide-open, aim-

for-the-fences game. But the earlier style of play is still with us. Whitey Herzog, manager of the Kansas City Royals, who liked to put on the double steal or hit and run, was quoted in 1978 as saying. "If you understand 'inside' baseball, you gotta love us." According to Red Barber, the

WASHINGTON — It is one of Tallahassee Florida the about VV those underappreciated, inside baseball moments that raffy politics as the Ultimate Game. "So begins a Michael Kramer column in 115 Manual State of an inner ranks and an inner ranks are a since I've been in baseball. The idea of an inner ranks are all the idea of an inner ranks." torum, goes back all the way to the

days of tribal government. From its sports context comes its political or professional denota-tion: minutiae savored by the co-gnoscenti, delicious details, nu ances discussed and dissected by aficionados.

In politics, candidates who say want to discuss larger issues look down their noses at the jour-nalists and think-tankers who be devil them with questions about campaign techniques, fund-raising plans and poll results. To them, inside baseball has a pejorative connotation that the phrase never gamed in the baseball world. There ont-of-eason reminiscences by avid fans, accompanied by rumors about next year's activities, are called the "Hot Stove League."

OMING UP fast on the outside is a synonym for inside baseball from the sport of kings. A horse race has long had a sense of "hard fought competition," but when the word stories is added, a new sense is born: emphasis on the who's-shead aspect of a campaign to the exclu-sion of the substance presumably

being discussed.

In 1984, Gerald Warren, editor of The San Diego Union, told a journalism audience that "some say the horse race is the story."
In 1988, Irvin Molotsky, reporter

for The New York Times, wrote that the defeated presidential hopeful Bob Dole complained that "reporters repeated gossip, wrote house race stonies" that concentrate ed on who was ahead and put 'titil lation above education.' In thi criticism, the Republican Senate minority leader repeated the charge of President Immry Carter late in the 1980 campaign: that horse race stories contributed to voter apathy. "Few stories are easier," wrote David Shaw in the Los Angeles Times in 1986, "to write - or read — than the horse race story: who's ahead and why." He was referring not to politics, but to the newspaper coverage of television news competition: There is now a horse race almost every week in the eve

# The Big Chill, or Cooling It in the Acropolis

NICE — In unseasonable but Nappropriately chilly weather, 185 delegates from over a dozen countries have gathered in Nice for the sixth World Frozen Food Congress, a biennial event at which a lot of information can be gleaned. To wit:

• The fish (inger market is stagnating in France, and so is raw pastry dough. • Frezen food sales seem to

#### correlate with sales of microwave MARY BLUME

ovens. In the United States, 85 percent of homes have microwaves and each American eats 90 pounds (40 kilgrams) of frozen foods per annum. In Britain, 35 percent of homes have microwaves and consumption of frozen foods is 20 kilos. The Netherlands has a lower microwave count and a frozen food consumption of only 14 kilos.

There is no satisfactory way to freeze fresh lettuce.

• The French housewife spends 3 hours a day in the kitchen, the

English housewife 11: hours, the

American 30 minutes.

• In Spain, frozen food consumption rose by 800 percent from 1970 to '80, but the 1980 total was only 1.6 kilos a person. In seafood products alone,
 1,100 new items were introduced to the U.S. retail market during

the 1983-87 period. Roger Vergé, the celebrated chef of Mougins, outside Cannes, uses frozen fruit purees, frozen cèpe mushrooms out of season, and, on occasion, frozen aspara-

gus tips.

• If a seismic upheaval had not created the Strait of Gibraltar and ing about aseptic packaging and old bettes noires such as the pub-a steady flow of water from the Atlantic, the Mediterranean but particularly effective on not natural. "Natural! Arsenic would be but a small sait lake,

The last item comes from Alan Davidson, the respected food historian who is not a delegate but who has been invited to talk on his cialty, fish. Since the theme of the congress is the Mediterranean, nesse scampi, imitation crab from whiz who gave his product what the cookery writer Claudia Roden Seattle, British Chilli Beef Grillabe hoped was a Danish name alhas also been asked to speak on dos, Thai oysters or Israeli sauthe cuisine of the 16 countries that sage rolls. There are no exciting border the sea.

Frozen foods having passed met level, a French aide explains that Roden and Davidson have

been invited to give frozen food its Nice's convention hall, immodesttitres de noblesse. Also, savs Gra- ly called the Acropolis, in the Herham Kemp, the congress director, mes room (the Athena room has "The frozen food industry has got been taken by a real estate group), to grow up. It has been too locked Only a few hundred feet away is into basic commodities and has old Nice and the Cours Saleya, ested in food and cuisine."

The public may be interested, but food and cuisine are far from peaches the minds of delegates who seem to be dark-suited marketing men with charts and technologists talkstrawberries and fish.

Food is referred to as product, particles or blocks and there is nothing to see or taste: no frozen marvels such as Japanese Style Bread Crumbs, Polish squid, Chimachines such as the extruder of Frozen foods having passed millefeuille pastry (the process from the convenience to the gourends under a pneumatic guillo-

The congress is meeting in

forgotten that the public is inter-ested in food and cuisine." with piles of gleaming Mediterra-nean fruits and vegetables and the smells of spices, fresh peonies and

In the convention room the air is climate controlled and people come and go with flow charts and and strychnine are also natural," says Mark Stevens of Haagen-

Dazs ice cream. Haagen-Dazs, which is expanding to the Orient and Europe, was invented in 1960 by a marketing though it was made in the Bronx. Stevens says their Macadamia Brittle was just chosen ice cream of the year and that the other big news is that Haagen-Dazs is going into soft ice cream.

Soft ice cream has to be made

fresh each day, which would seem cause they were distributed before to remove it from the frozen catazen foods may be toward the fresh with the startling development of a rival, or a branch, depending on the viewpoint: chilled foods. Chilled foods are packed in

transparant plastic, are displayed

horizontal chests, and have a limited shelf life. "Now buyers think fresh is best and chilled is fresher than frozen. How ironical." Graham Kemp says. "Chilled food is just putting the old things in different packets. Some frozen food people talk of the high bacteria count in chilled foods, others have joined the potential enemy. In the United States chilled and deli foods are on the rise because they take no preparation at all, says Gail Lange

"People find microwavable foods take too much time. It's getting ridiculous," she says.
At the other end of the spectrum is Greece, where frozen foods got off to a bad start be- zen foods.
